You get this sentence, an assessment of the limitations of Greek culture, Greek view of life, ‘the more completely the Greek felt himself to be at home in the world, the more happily and freely he abandoned himself, to the exercise of his powers, the more intensely and vividly he lived in action and in passion, the more alien, bitter and incomprehensible did he find the phenomenon of age and death, people getting older, finally they have to face death, they could not understand anything about this wonderful experience of aging and died. In the young age senses are powerful, you can enjoy, that kind of thing they knew, the other side of the truth they did not know, transcendental trans-sensory, they did not know, then he says “of this problem, so far we can judge he received ...? Religion, but little light, and still less consolation, the official religion of Greece was extremely worldly religion, their gods were all worldly, they all want worldly pleasure, Just a worldly religion they had, Olympian god etc.,.... how can that religion give any insight of the deeper dimension of human personality or of reality.’ The music of his brief life With the discord un... and even before reason has brought ???ism, So he knew whatever religion he is practicing can not answer the problems that are afflicting him, that is the exact situation in the modern West as well, that is also mentioned by Ian ? Foster, another famous English writer referring to Greece, “has a land encompassed within the tiny circuit, of her city states, much that affects and afflicts the modern man in his relationship to the society, he derived from Greece, what affects us what

afflicts us today, that we get it from the ancient greek heritage, that weakness is being corrected today by coming in touch with the Upanishads,
